Quick Reference Guide

Thermo Scientific products help to solve your most demanding analytical challenges with our world-class portfolio of products and technologies. Whether for your laboratory, field or industrial settings we offer a complete spectrum of solutions including automation, accessories, consumables, software & reference databases, service and support.

**Cement • Clinical Toxicology • Environmental
Food, Beverage and Agriculture • Metals and Materials
Petrochemical • Semiconductor**

Organic and inorganic analysis in environmental, health and industrial applications require instruments that can handle a variety of sample types, volumes and demanding detection limits. Results need to be reliable, fast and easy to obtain. Our range elemental analysis solutions enable laboratories to analyze more samples with greater accuracy, simplicity and cost-effectiveness.

Thermo Scientific GC and GC/MS systems are used in almost all fields of analytical chemistry, including major fields such as environmental, clinical research, forensic toxicology, flavors, fragrances and food safety applications. Our mass spectrometers are established in research laboratories as well as in routine and high-throughput QA/QC labs.

A broad range of Thermo Scientific HPLC and UHPLC chromatography systems and columns offers a one-stop source for products that separate, identify, quantify and analyze natural substances, chemical mixtures or biological samples. From routine HPLC requirements found in QA/QC, to flexible UHPLC systems for method development, R&D, and contract laboratories, Thermo Scientific offers complete solutions for all types of application fields.

• Pharmaceutical**

Thermo Scientific MS systems are used in almost all fields of analytical chemistry, including proteomics and metabolomics, the complete drug discovery and development process, as well as environmental, clinical research, forensic toxicology and food safety applications. Our mass spectrometers are established in high-end research as well as in routine and high-throughput screening and quantitation experiments.

Food and Beverage • Forensic Toxicology • Governmental Labs**

Thermo Scientific systems effectively tackle environmental target compounds studies in food and feed, soil, water, and air. Also used in organic chemistry, clinical research, forensic toxicology as well as climate research and other geochemical applications. Additional capabilities used in metabolomics.

When it comes to managing your most valuable asset, the data being generated in your laboratories, there is no more trusted brand than Thermo Scientific. Our powerful informatics solutions help supervisors and scientists to manage their laboratory workflow, ensure regulatory compliance and promote enterprise-wide collaboration for faster, informed decisions. Over 30 years of leadership across a variety of industries has allowed our company to grow with your business needs and develop a comprehensive portfolio of laboratory and data management software, including:

- Laboratory Information Management Systems (LIMS)
- Chromatography Data Management Systems (CDS)
- Document Management Systems (DMS)
- Electronic Laboratory Notebooks (ELN)
- Spectroscopy Software

Understanding your needs is our first step in developing the purpose-built software solutions you can count on.

Our complete portfolio of services and management solutions are designed to help you improve productivity, reduce total cost of ownership and ensure compliance throughout your laboratory - from instrument and equipment acquisition to disposition, regardless of manufacturer.

Asset & Service Management

Manage your assets through their lifecycle – from acquisition to disposition – with integrated solutions such as asset management, multi-vendor services, biomedical services and service contracts.

Support Plans

An affordable range of support plans covering instruments from different techniques and manufacturers, to proactively control service costs and improve lab productivity. Benefit from a selection of guaranteed response times and predictable costs that include travel expenses, labor and replacement parts.

Education Services

With more than 50 scientific instrument, application and compliance training courses on both Thermo Scientific and non-Thermo Scientific instruments, you will have access to the latest instruction and best practices in your field. Small class sizes and guaranteed time in the lab will ensure you receive hands-on instruction. Customize methods to suit your needs and build more robust protocols to gain consistent operations and results.

Parts, Accessories, Consumables, Upgrades and Software

From industry-leading software packages to parts, accessories, upgrade products and consumables, our aftermarket products streamline workflows while protecting years of investment for your organization. All Thermo Scientific parts, accessories, and consumables are performance-certified and fully warranted to perform to our products' rigorous design specifications.

Thermo Scientific offers customers a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents to enable integrated laboratory workflow solutions. Fisher Scientific provides a complete portfolio of laboratory equipment, chemicals, supplies and services used in healthcare, scientific research, safety and education. Together, we offer the most convenient purchasing options to customers and continuously advance our technologies to accelerate the pace of scientific discovery, enhance value for customers and fuel growth for shareholders and employees alike.
